

Wick Sourcing and Installation Eligibility Checklist

Use this checklist to quickly confirm whether your candle project is a fit for JAFE's wick sourcing and installation service.

This service is an extension of JAFE's glass decorating services and is designed for customer-filled candle projects.

Glass & Decoration

- Glass is decorated by JAFE
- Decoration specifications are finalized or in progress

Filling Method

- Candles are filled at my company's facility
- JAFE is not responsible for filling, testing, or burn validation

Container Style

- Container style is **917** or **918**

Sustainer Compatibility

- Approved sustainer style: **A3797** or **A3799**
- Wick is compatible with the selected approved sustainer
- No alternative sustainers or modifications are required

Wick Specifications

- Wick series and size are defined
- Current wick supplier is identified
- Wick specifications are finalized prior to production

Wick Sourcing & Ownership

- Wicks will be sourced by JAFE
- Wicks will be supplied on spools and owned by JAFE
- Customer-supplied wicks are not required

Process & Expectations

- Wicks will be installed by JAFE using approved hardware
- High-melt glue installation is acceptable
- All wick testing and final burn approval will be handled by my team

If all boxes are checked

Your project is likely a good fit for JAFE's wick sourcing and installation service.

The next step is to share your container style, decoration details, sustainer selection, and wick specifications so compatibility can be confirmed.

If any boxes are unchecked

Your project may fall outside the current service scope.

We recommend reviewing the unchecked items before reaching out so expectations and timelines remain aligned.

Questions?

Contact JAFE to review your project details and confirm eligibility.
